

Sheet glass

Open joint-stock company GOMELGLASS

2018 - up to 40 million square meters of glass in a year

The basic and the main course of OJSC “GomelGlass” activity is the production of high-quality large-format sheet float glass. Colorless and clear sheet glass is a necessary component for the manufacturing of building translucent structures, coated automobile and safe glass, some glass articles for furniture, glass packs and many other special types of glass.

Nowadays the manufacturing of float glass is produced by the float process on the modern German lines.

The entire set of production and social factors, the company’s development dynamism, the innovation and modern technologies allow OJSC “GomelGlass” to look to the future with optimism, to feel itself confident and stable in the glass market.
